

# WELLCOMEMD

[Keep current on COVID-19 information at our COVID-19 Resource Center](#)

At WellcomeMD, the health and safety of our patients takes precedence over anything else that we do. With that in mind, we want to make you aware of the processes we have put in place in response to the spread of the novel Coronavirus known as COVID-19.

We are taking these steps out of an abundance caution and to help mitigate the spread of this virus.

## **Please contact us immediately if you feel you need to be tested for COVID-19**

WellcomeMD will have the ability to test patients for COVID-19 starting Monday, March 16.

Symptoms of COVID-19 include fever, cough and shortness of breath. **If you are experiencing these symptoms and have recently traveled to a country with sustained community transmission or believe you have been in contact with someone infected with COVID-19**, contact your physician or our staff immediately.

Make an appointment to drive to our office and one of our health professionals will safely administer COVID-19 testing in your car and submit samples for testing.

## **Consider scheduling a telemedicine visit if you are at risk of serious illness**

If you are over the age of 60 or have an underlying medical condition such as heart disease, diabetes, lung disease or autoimmune disease, you are considered at greater risk for serious illness or even death associated with COVID-19. Because of this, you may want to schedule a telemedicine visit with your physician rather than come into the office.

WellcomeMD is proud to offer telemedicine visits through Doxy.me, a secure HIPAA-compliant service, at no additional cost to our patients.

To schedule a telemedicine visit, simply call our office.

WellcomeMD.com, 2500 Gaskins Rd, Suite A, Richmond, VA 23238, United States, (804) 774-7099
